## Company Introduction

KORAD was established in January 2009 to build a structure of mutual control and balance by separating management organizations from waste producers. KORAD is to make best efforts to improve radioactive waste management with the world's best technology and eco-friendly methods.

## Major Products and Services

- Transport, storage, treatment and disposal of radioactive wastes
- Site selection, construction, operation and post-closure management of the radioactive waste facilities
- Collection, survey, analysis and management of documents for radioactive wastes
- R&D, HRD and international cooperation of radioactive waste management

## Major Business Records, Partners and Markets

With the underground disposal facility (Phase 1 disposal facility), KORAD is taking care of the wastes in underground silos, which are in the end of underground tunnels. After the silos is full of wastes, KORAD is to seal the entrance with concrete and crushed rocks to isolate the waste from natural environment.

Now, KORAD is building the facility in Phase 2, near-surface disposal facility for low and intermediate level radioactive waste to hold 125,000 drums in maximum.

- Status of Disposal Facility in KORAD by the end of 2019
  - Undertaken : 23,323.8 drums
  - Intermediate Storage : 5826.20 drums
  - Denounced : 17467.6 drums (in 6 silos)
